Most Advanced & User-Friendly Features

Sigmax Hybrid Digital Event Recorder (HDER) and Center Management System (CMS) are designed from the perspective of security professionals with IT proficiency in mind.

Sigmax systems provide the most efficient solutions to ever-demanding needs of security professionals ranging from a small grocery store to a city-wide installation. Our solutions are comprehensive and remain yet so simple to use that both IT and security personnel can appreciate.

Sigmax's Advantages

- Up to 16 analog and 16 IP cameras can be connected to a single server.
- Support most major leading manufacturers' IP cameras (including mega-pixel ones).
- Higher Screen Resolutions, 1280 x 1024 default, up to 2560 x 1600 (optional).
- Dual monitor support, up to 8 display monitors (optional).
- Multiple camera display modes up to 36 cameras per screen for both live view and playback.
- Drag and drop picture in both live monitoring and playback mode to form a useful video group.
- Pan / Tilt / Zoom Preset and Auto-Tour functions for most PTZ cameras PTZ control speed adjustable for almost all models.
- Smart motion detection Sensitivity, noise-tolerance, motion block, pre-post dwell time.
- Integration with Access Control, Alarm I/O, and other IP-based systems (optional).
- POS/ATM interface (optional) Compatible with over 700 different POS/ATM/cash registers and over 20 years of know-how.

Data mining supported.

- Exception Report Greatest tool to improve loss prevention. Alert authorized users of
 exception event in real time and/or report all exception events at the end of day for review.
- Interface with industrial, commercial, and medical electronic measurement equipment Our senior Electronics/IT engineer team will work with you on project where Video/Audio/Data integration is crucial to you (e.g. Electronic weight scale, Flow meter, EKG/ECG, Radar gun, Time Clock, Auto-ID system, Biometrics, etc).
- Instant review Instant playback of any event on the event list without interrupting live view.
- Two way audio communication.
- Audio recording Two channel standard; optional all channel audio for as many cameras.
- Internal storage space Up to 20 TB, RAID optional.
- Network Storage Servers (NSS) support User can program any storage drives of any NSS to be an extended storage or duplicate back-up copy to any HDER on the network.
- File integrity User can mark important recorded files for non-recycle; rebuild data file in case of file corruption due to power loss or any other reason.
- Powerful search and playback function Search by timeline, event, text stream, exception, alarm, audio signal, snapshots; playback in multiple display mode, full screen, various speed, text overlay turned on/off, synchronized audio,
- Easy video exporting Exporting single or multiple video images in JPEG or AVI format with audio and text overlay. Digital authentication available. It is easy, fast, and self-explanatory.
- Event notification Video pop-ups, audio warning, on-screen visual alert, and email messaging (with snapshots) on exception, motion, alarm, video loss, network failure, HDER down, etc.
- Remote access via cellular phone, web browser, Sigmax "Remote Lite", Sigmax CMS.
- Central Management System with multi-site multi-HDER Layer-structure Greatly simplified the complexity of managing thousands of cameras across multiple sites.
- User authorization management Most comprehensive and self-explanatory in the market.
- Video profile setup Drag and drop camera pictures to form a meaningful video profile.
 Create and manage as many video profiles as you need.
- Free software upgrade via Internet (within same category, e.g. same 4.X.X.X) and unlimited number of remote client access as long as the network traffic support it.
- Easy HDER and CMS system configuration backup and restore.
- System activity log, alarm/ motion/ exception event log.

- Built-in daily health check-up function.
- Automatic restart when A/C power resumes. Built-in hardware and software watchdog.
- Highest Product Quality Only market proven quality parts used, all systems with 7-day burn-in and rigorous function check and re-check by experienced senior engineers.
- Superior technical support Seasoned field-experienced engineers are available to you only a phone call or e-mail away.
